Figure Economic impact of pollution control investment by the private sector

Global Environmental Conservation Market in2000(Forecast)

Hazard to be prevented	Item	Market scale in2000 (Forecast ; in bil.yen)	
1.Global warming	Cogeneration	100	2,555
	Insulators	200	
	Solar systems	80	
	Exhaust heat recovery	105	
	Nuclear power generation	600	
	LNG-fired power generation	500	
	Solar batteries	200	
	Fuel cells	600	
	Wind power generation	20	
	Smoke decarbonizing systems	100	
	CO2 recycling technology	50	
2.Acid rain	Smoke desulfurizing systems	100	370
	Smoke denitration Systems	80	
	Methanol-fuel cars	50	
	Acid-resistant paints	140	
3.Ozone layer destruction	Alternatives to CFC	700	700.3
	CFC recovery systems	0.3	
4.Deforestation	Recycled paper	350	350
5.Marine pollution	Drainage treatment facilities	330	330
6.Desertification	Greening plants	3	3
7.Harmful wastes	Waste disposal facilities	1,000	1,060
	Degradable plastics	60	
8.Pollution in developing countries	Environmental Consulting	130	130
